

# Shreyas Jayant Kudav

Date of Birth: 17/06/1995

Contact no: 9769990261

Email: [shreyaskudav@gmail.com](mailto:shreyaskudav@gmail.com)

## Experience

**Software Developer - Nimap Infotech**, Mumbai, 11/2019 (*Present*)

**Software Developer - Inquizity Metanoia**, Mumbai, 6/2017 - 11/2019

I was responsible for working closely with the internal team or in some cases dealing with clients directly to understand the requirements, designing database structures, implementing portals, research & development and got multiple opportunities to work on multiple technologies.

## Education

- **Bachelor of Engineering, Information Technology (2014 - 2017)**  
University of Mumbai,
- **Diploma in Computer Technology (2014 - 2011)**  
MSBTE, Babasaheb Gawde Institute of Technology

## Technical Skills

- Programming Experience: **C#, PL SQL/SQL, Javascript/Typescript, PHP, C/C++, AngularJS, Angular7**
- Technologies: **.NET Framework MVC (ADO.NET), Rest API, Microsoft Azure**
- Other Experiences: **Python, R Programming, Problem Solving, Photoshop**

## Professional Course

- **Oracle Database Administration, (2012 - 2014)**  
SeedInfoTech, Mumbai

## Projects

### Online Medical Repository,

An online web application to store digital copies of the patient's/user's medical history. A Management System for hospitals and doctors associated with registered hospitals.

Technologies: PHP, SQL/ PL SQL

### Inventory Analysis Dashboard,

A dashboard that displays monthly & yearly Inventory analysis in charts and graph format using Google charts. It also includes an automated integration of retrieving data from FTP server to the database.

Technologies: Angular 7, SQL/ PL SQL, Google Charts

### Vendor Portal,

An online MVC Application developed for vendors to manage their items/material. The process flow right from vendor offering material for quality inspection, allocation, dispatch to automatic data updation to SAP.

Technologies: .NET MVC & SQL/PL SQL.

### Customer Portal,

An online MVC portal developed for logistics department of a tire company, to upload daily orders received from customers and updating the same to SAP through Business APIs.

Other basics CRUD operations on uploaded reports.

Technologies: .NET MVC, SAP Connectors & SQL/PL SQL.

### **Invoicing Portal,**

An internal web application used to maintain customer data, creating quotations, sales orders and invoicing against POs raised by the client. Other features involved, printing invoice in required .PDF format using .NET Report Viewer.

Technologies: Angular 7, SQL/ PL SQL, Report Viewer

### **Microsoft Outlook Graph API (*Research & Development*),**

A service that would access outlook email server for read / write / forward / reply mails through API provided by Microsoft Outlook.

Technologies: .NET MVC.

### **Integration & Automation,**

A good amount of understanding and experience in automation projects. Mainly involving interface implementation for data exchange with SAP. Experience in methodologies: FTP & Business API.

Technologies: .NET Console App.

### **Personal Projects**

1. SQL Query Builder - An application that generates SQL Joins using interactive UI controls. (Angular & .NET API)
2. Image Text Reader - A tool that reads data/text from images to plain text. (.NET)
